

## **IRMA NIGERIA INFORMATION**

Irma Nigeria was born out of the need for proper channeling of efforts and resources in advocating for the total well-being and health care of sexual minorities and MSMs in Nigeria. This was after due consultations with IRMA International Steering Committee members in April 2009.

The membership cut across MSMs, sexual minorities and HIV/AIDS Advocates in Nigeria.

### **MISSION:**

The mission of IRMA Nigeria is to complement the efforts of IRMA International and NHVMAS in Nigeria, accelerate research, convene diverse perspectives on scientific discipline, advocate for rectal safety studies on viable virginal microbicides, advocate for the conduct of research that may facilitate rectal microbicides research in Nigeria, and provide a central forum for exchange and debate on Rectal microbicides and biomedical HIV prevention technology research, development and access. For more information on IRMA, please visit. [www.rectalmicrobicides.org](http://www.rectalmicrobicides.org)
